

Amgraf, Inc.

Forms Software Technology for Print Manufacturing, Industry and Government

Amgraf Celebrates its 40th Anniversary in 2016!

Amgraf, Inc. is a leading software development company dedicated to adding value to the business forms industry through innovative solutions for the management, production, and utilization of forms, labels, and security documents. Many of the largest print manufacturers and governmental agencies in North America have chosen Amgraf software technology for forms design and management.

Located in downtown Kansas City, Missouri, Amgraf has been a trusted supplier and partner in prepress automation development since 1976. Our customers span the globe, and include the most respected printers, business and industry leaders, and governmental agencies. We take great pride in our products and our excellent record of ongoing customer service and support.

Our Products and Services

Amgraf, Inc. markets a comprehensive suite of electronic forms software and solutions. Our e-forms software supports local printing and saving, database connectivity, web-based data presentation, intelligent data capture, online data submission, e-mail, and secure digital signing.

We also offer systems for the total automation of business forms production. Our prepress capabilities include interactive layout and design, batch composition and pagination, electronic proofing and annotation, imposition and ganging, digital printer interfaces, variable imaging, and complete prepress workflow management.

Our products and services include:

OneForm™ Designer Plus – Software for the creation of HTML & PDF e-Forms

Amgraf Forms Portal – Online Forms Catalog with Access Control and Records Management

OneForm™ Manager Lite – Personal Forms Manager

MECCA™ 2000 – Composition workstation for the creation of business forms, labels, and security documents

LogoDot™/NaNOcopy™ – Patented Security Screening Technology

E-Forms Service Center – Forms Design, Development, and E-Forms Hosting

VoidMaker™ – Online Self-Service Void Pantographs
