

Press Release

Amgraf Establishes Strategic Partnership with Voice Signature

Kansas City, MO – September 12, 2006. Amgraf, Inc. announced today the formation of a strategic partnership with Voice Signature LLC, the provider of the VoiceBond™ Web Service – a service that enables companies to collect electronic signatures on important transactions using an ordinary telephone. As part of the agreement, Amgraf will enhance its *OneForm Designer Plus* forms design package to add VoiceBond™ signature field connectivity. The enhanced version of Amgraf's popular software will be available to new and existing customers in the 3rd Quarter of 2006. However, a demonstration of how the VoiceBond™ web service will be used to sign an online form created using *OneForm Designer Plus* is available at www.amgraf.com and www.voicesignature.com.

VoiceBond™ enables business to be conducted more efficiently and sales to be closed more quickly. Capitalizing on new e-commerce laws, it allows people to affix legal signatures to complex transactions, using only their voice. It eliminates the hassle and delay of circulating paper documents for signature by fax or mail. Technically, VoiceBond is a patent-pending way to bind a spoken statement to the content of a legal record, be that record paper or electronic.

“Our partnership with an industry leader like Amgraf is very important. Our customers will now have an option to present blank or pre-filled forms to customers and get them signed quickly and easily – all with a single solution,” says Voice Signature CEO Clay Kittrell. Franklin Garner, the CEO of Amgraf, Inc, agrees, “Our partnership with Voice Signature offers customers a solution that they have been looking for – a way to host forms AND get them signed securely, quickly and without significant expense. The VoiceBond™ process consists of a simple yet structured signing ceremony that records the unique qualities of your voice to electronically sign a transaction, and it's amazing how recognizable your voice is when you hear it. That binds you and your intentions to the transaction even better than a wet ink signature. We think this technology will greatly advance the usage of electronic forms for all kinds of transactions.”

While the adoption of electronic signatures has picked up in recent years, industries have still been hesitant to integrate electronic signatures into their internal processes in a significant way. Attorney Benjamin Wright, author of *The Law of Electronic Commerce*, believes Voice Signature has a solution that will break down barriers to the adoption of electronic signatures. “Voice Signature has invented a clever electronic signature process that is far superior to other solutions on the market today. It's easy to use for both enterprises and end users. The legal archive it creates is powerful, but transparent and easy to understand. What's more, the voice signature solution is most affordable.”

About Amgraf (www.amgraf.com)

Amgraf, Inc., founded in 1976, is a privately held Kansas City based software company dedicated to adding value to the business forms industry through automated solutions for the production and utilization of forms, labels, and security documents. Amgraf's software products are for both traditional paper-based forms production as well as the latest e-business applications. For additional information contact Franklin Garner at (800) 304-4797.

About Voice Signature (www.voicesignature.com)

Voice Signature LLC, founded in 2002, is a privately held technology company helping enterprises get legally binding electronic signatures from consumers using voice. Its VoiceBond™ signature solution is attractive in many industries, as it provides a means to dramatically improve productivity while at the same time enhancing customer service. Voice Signature LLC has numerous pending patent applications. The patent-pending ideas behind VoiceBond™ include unique methods to link a voice and/or video statement to the terms of a legal transaction and techniques for making a legally-defensible archive of voice/video-signed terms. For additional information contact Clay Kittrell at 1-888-548-8407.
