Amgraf Nominated for Best Software and Best Technology Provider Awards at Gartner Print & Imaging Summit

Kansas City, MO – December 12, 2006. Amgraf, Inc. announced today that it received nominations for both the Best Software and Best Technology Provider Awards at the recent Gartner Print & Imaging Summit held December 4-6 in Carlsbad, California. The Best of Print & Imaging Summit Awards, which recognize vendors that have demonstrated excellence and leadership in the print marketplace, were voted on by the attending IT executives after reading case studies and attending one-on-one briefings about the solutions.

Amgraf's *OneForm Designer Plus* and *MECCA 2000 Integrated Electronic Publishing Systems* are widely used for printed document and forms automation. At the Summit, Amgraf demonstrated how these standard off-the-shelf products can be configured to support:

- An online-composition web site for the automated production of direct mail documents.
- Paper-optional electronic forms for intelligent data capture and workflow.
- Voice Signatures – a business to consumer method for legally signing important documents online *before they are printed.*

OneForm Designer Plus starts with a business form, form-based procedure, or imprintable document. Next, the document image is automatically converted into a software application. It is then easy to interface to web services for user access control, variable data merging, digital signatures, mailroom processing, e-commerce, and many other functions. "The response from the Summit attendees was awesome! We showed how to build an online printing and workflow solution from paper-based documents." said Franklin J. Garner, III, President and CEO of Amgraf. "We think customers also recognized the savings potential of our innovative software licensing model."

In its first year, the Gartner Print & Imaging Summit is an industry-defining event produced by Gartner, the recognized research and thought leader in the office and production print space. Neither Gartner nor any of its affiliates voted for the winners of awards.

About Gartner Print & Imaging Summit

The Gartner Print & Imaging Summit is the industry's most comprehensive business conference exploring management and investment strategies for the successful enterprise. The only print and imaging event to feature the insights of the world-renowned Gartner analyst team, the Summit offers a uniquely interactive forum designed to facilitate dialogues between Senior IT and Business Executives from both office and production print organizations and the world's leading Technology Providers.
