Amgraf's OneForm™ Manager Lite
Personal Forms Server

The OML
Button

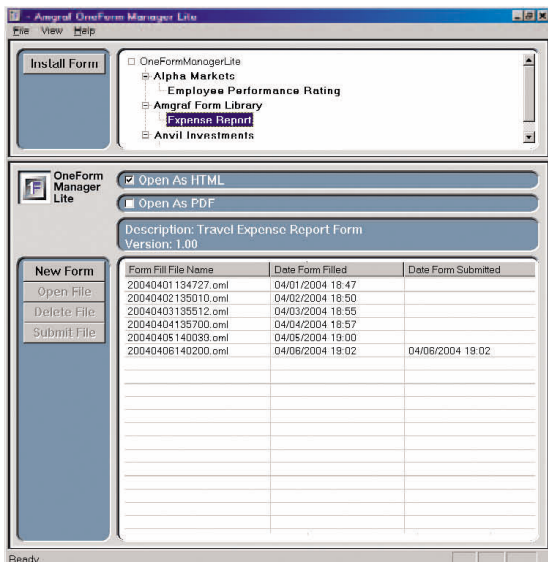

Smart organizations can easily deploy HTML and/or PDF fillable electronic forms with Amgraf's new *OneForm™ Manager Lite* (OML) software. OML catalogs HTML and PDF e-forms by classification and date, and provides an efficient method to distribute, organize, and manage hundreds of different electronic forms within an enterprise setting. OML-compatible electronic forms can be created in minutes with Amgraf's *OneForm Designer Plus* forms design package. Through OML, users can keep a secure local copy of every electronic form they fill out. When desired, users can locally open, update, and submit filled forms to Internet servers for centralized data collection.

Copy – Retain – Organize – Submit
All Your Electronic Forms
