Amgraf Forms Portal

Enterprise Forms Management & Workflow Automation

FORMS PORTAL

Securely Publish, Manage, & Process eForms From a Single Web-Based Platform

The Amgraf Forms Portal provides a secure, browser-based solution for publishing, organizing, and managing eForms. Working seamlessly with ***OneForm™ Designer Plus - Universal***, it transforms individual forms into efficient business processes while improving document control, security, and user accessibility.

Forms Portal Features

CENTRALIZED MANAGEMENT

The Forms Portal provides a single, organized repository for eForms, making it easy for users to locate the documents they need while ensuring administrators maintain complete control over access and versioning. Forms can be organized by department, function, or business process and securely distributed from one centralized location.

SECURITY & INTEGRATION

Built for enterprise environments, the Forms Portal combines role-based access control, secure data collection, and electronic records management with integration to existing databases and business systems. The result is accurate information, protected data, and seamless communication between forms and enterprise applications.

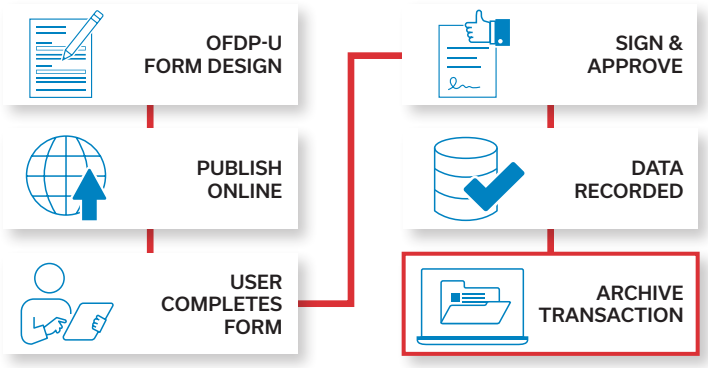

WORKFLOW AUTOMATION

The Forms Portal manages the complete lifecycle of eForms. Users can create, save, edit, submit, and route forms through review and approval workflows. Throughout the process, users can attach supporting documents and track a form's status. This streamlined approach reduces manual paper handling and improves process efficiency.

BUSINESS BENEFITS

The Amgraf Forms Portal provides more than online access to forms—it delivers a centralized platform for secure document management, workflow automation, and enterprise integration. By improving forms access, strengthening document security, improving data accuracy, and reducing administrative effort, organizations can increase productivity and focus on what they do best.
