Amgraf, Inc.

Digital Forms & Workflow Automation Solutions

Innovative Form Solutions Since 1976

For over five decades, Amgraf has helped organizations streamline the way they create, manage, distribute, and process business-critical forms and documents. From commercial print manufacturers to government agencies and enterprise organizations, our software solutions streamline workflows, improve data accuracy, and accelerate digital transformation.

Headquartered in Kansas City, Missouri, Amgraf combines decades of forms automation expertise with today's web technologies to deliver secure, scalable solutions that simplify complex document workflows. Our customers rely on us for dependable software, responsive technical support, and long-term partnerships built on success and trust.

What We Do

Amgraf develops software solutions that bridge traditional print workflows with state-of-the-art digital business processes. Our technologies enable organizations to:

- Design intelligent eForms
- Automate document generation and workflow
- Capture and validate data digitally
- Securely collect online submissions
- Integrate eForms with existing databases and systems
- Manage digital records and document lifecycles
- Capture digital signatures and securely submit data
- Improve efficiency by reducing paper-based processes

Whether deployed in-house or through web-based environments, Amgraf helps organizations reduce costs, eliminate redundant data entry, improve compliance, and provide a better forms experience to users.
