PDF Forms Generator Module

Create Interactive, Submittable, Database-Connected PDF Forms for Web & Production Print

OneForm™ Designer Plus View of eForm Layout

Extend OneForm™ Designer Plus - Universal with powerful PDF capabilities that transform existing documents into interactive, data-driven eForms.

The ***PDF Forms Generator Module*** is an optional extension for ***OneForm™ Designer Plus - Universal*** that enables organizations to convert existing PDF documents into professional fillable forms for secure data collection, electronic submission, and enterprise workflow integration.

Preserve the appearance of your existing forms while adding the intelligence required for today's digital business processes.

Transform Existing PDF Forms with Enterprise Features

Quickly enhance standard PDF documents with features that improve efficiency, accuracy, and the user experience:

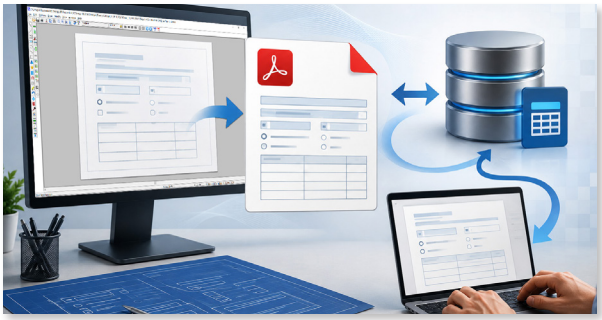

- ✓ Create interactive fillable fields with real-time data validation and automatic calculations
- ✓ Import and enhance existing fielded PDFs, then add or revise intelligent form fields and business logic
- ✓ Connect forms to enterprise databases and generate secure server-side processing
- ✓ Publish interactive PDF and optional HTML versions from a single design
- ✓ Integrate seamlessly with the Amgraf Forms Portal for forms management and business workflow automation
- ✓ Capture digital signatures and securely submit data
- ✓ Print, save, and recall capabilities

IDEAL APPLICATIONS

The PDF Forms Generator Module is well suited for organizations requiring secure, reliable eForms, including:

- Government and public sector forms
- Employee onboarding and human resources
- Pension and benefits enrollment
- Regulatory and compliance processes
- Financial and administrative forms
- Customer applications
- Healthcare documentation
