

VisiDiff™ Proofing Automation Software

Automated PDF Comparison for Accurate Print Production

Detect document changes instantly and verify every revision with confidence.

VisiDiff™ automatically compares two nearly identical PDFs and highlights every visual difference. Designed for commercial printers, forms manufacturers, and graphic production, it helps eliminate costly errors by enabling proofreaders to quickly verify intended revisions and catch any unintended changes before a job reaches press.

Why Choose VisiDiff™

STREAMLINED PROOFING WORKFLOW

VisiDiff™ generates an interactive approval file that guides proofreaders directly to each detected change. Reviewers can quickly visually compare each change zone to verify revisions, document approvals, and complete quality reviews more efficiently reducing proofreading time.

QUALITY ASSURANCE

Using advanced pixel-level comparison technology, VisiDiff™ detects even the smallest visual changes—including text edits, object movement, color modifications, and formatting differences—that might otherwise be overlooked.

BUSINESS BENEFITS

Under demanding production schedules, manual proofreading can be both time-consuming and error-prone. VisiDiff™ automates document comparison by directing reviewers only to areas that have changed, shortening review cycles, reducing the risk of costly printing errors, and providing documented verification that revisions have been reviewed before final approval.

Automated Change Detection

Even minor edits can produce unexpected changes within complex documents. VisiDiff™ compares **before** and **after** PDF files, identifies every visual difference, and creates clearly marked change zones, allowing reviewers to focus only on modified areas instead of manually inspecting entire pages.

Before		After	
Item 2	Number of production workers during pay period including the 12th of month	Item 2	Number of employees at this establishment
e. Sum of lines a-d		a. March	301
f. Average number (Divide line e by 4.)		b. May	302
g. All other employees (pay period of March 12th)		c. August	303
f. TOTAL f and g (item 2)		d. November	304
		e. Sum of lines a-d	305
		f. Average number (Divide line e by 4.)	306
		g. All other employees (pay period of March 12th)	307
		f. TOTAL f and g (item 2)	308

Compare Faster. Proof Smarter. Print with Confidence.

VisiDiff™ Proofing Automation Software helps organizations improve print quality, reduce production costs, and strengthen quality assurance by automating the comparison and verification of revised PDF documents.
